PROFILE SUMMARY

Results-oriented Full Stack Developer with experience in developing highly scalable web applications using Node.js and Python. Capable of designing APIs by leveraging FastAPI or Express.js, incorporating artificial intelligence or language model (LLM) capabilities, and utilizing databases such as MongoDB and PostgreSQL. Expertise in leveraging AI-based code generation technologies, like Codex and Claude, to boost development efficiency.

WORK EXPERIENCE

Zynthrix (Part Time) 2025 - 2026
Backend Developer

- Designed and developed high-performance backend services using FastAPI and Python, ensuring scalability, reliability, and efficient handling of production workloads.
- Implemented and deployed scalable FastAPI-based APIs, integrating secure authentication, database systems, and AI/LLM-powered features to enhance system functionality and overall performance.

Forsight IT Solutions 2025 - 2026
Full Stack developer

- Designed and developed end-to-end web applications across frontend and backend, leveraging modern JavaScript frameworks, Node.js, and Python/FastAPI to deliver scalable, high-performance solutions.
- Built and integrated RESTful APIs, databases, and AI/LLM-powered features, collaborating closely with frontend and backend components to improve application functionality, performance, and user experience.

Digi Solutions (Freelance) 2023 - 2025
Full Stack developer

- Built and delivered AI-powered SaaS applications as a freelance Full Stack Developer, handling frontend, backend, and cloud-ready architectures end to end.
- Integrated LLM APIs, scalable backend services, and modern databases to create intelligent, production-ready solutions for clients.
